(54) Title: INTRAVASCULAR DEVICE FOR FILTERING EMBOLI

(57) Abstract: There is provided a filter for use with a vascular occlusion device of the type having an elongated shaft and a number of radially expandable struts located near a distal end of said shaft. The filter comprises a hollow body made of a flexible material, with a proximal end and a distal end, and a region of maximum widthwise dimension located between the proximal end and the distal end. The body tapers from the proximal end to the region of maximum widthwise dimension and from the region of maximum widthwise dimension to the distal end. A number of pores are formed in the body, and the pores being sized to prevent emboli from flowing past the distal end when the filter is employed in the vasculature of a patient. Also disclosed are a web for preventing formation of thrombus on the struts of a vascular occlusion device, and a method for removing accumulated emboli from a filter.

WO 01/58382 A3

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/US 01/04457

### Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1.  Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
  
2.  Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
  
3.  Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

### Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1.  As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
  
2.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
  
3.  As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
  
4.  No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

1-5,6-12,13-1

#### Remark on Protest

The additional search fees were accompanied by the applicant's protest.  
 No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-5,6-12,13-17

A filter having a tapering hollow body and a number of pores arranged in at least one row in said body

2. Claims: 18,19,25-30

A vascular occlusion device having a filter comprising two cups whereby the first cup has an opening at its proximal end and the second cup having an opening at its distal end and the first cup having pores which are smaller in diameter than the pores in the second cup and a distal tip comprising a coil

3. Claims: 20-24

A vascular occlusion device comprising a shaft and a filter suspended on radially expandable struts attached to the shaft and a web attached to the distal end of the shaft and a distal tip comprising a coil

4. Claims: 31-39

A vascular occlusion device comprising a shaft, a core wire disposed in the lumen of said shaft and a core-wire mechanism which is attached at its ends to the shaft and the core wire and longitudinally or rotationally movable between a radially collapsed and expanded position and a filter membrane suspended on said mechanism

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/US 01/04457

### Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1.  Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
  
2.  Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
  
3.  Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

### Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1.  As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
  
2.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
  
3.  As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
  
4.  No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

1-5,6-12,13-1

#### Remark on Protest

The additional search fees were accompanied by the applicant's protest.  
 No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-5,6-12,13-17

A filter having a tapering hollow body and a number of pores arranged in at least one row in said body

2. Claims: 18,19,25-30

A vascular occlusion device having a filter comprising two cups whereby the first cup has an opening at its proximal end and the second cup having an opening at its distal end and the first cup having pores which are smaller in diameter than the pores in the second cup and a distal tip comprising a coil

3. Claims: 20-24

A vascular occlusion device comprising a shaft and a filter suspended on radially expandable struts attached to the shaft and a web attached to the distal end of the shaft and a distal tip comprising a coil

4. Claims: 31-39

A vascular occlusion device comprising a shaft, a core wire disposed in the lumen of said shaft and a core-wire mechanism which is attached at its ends to the shaft and the core wire and longitudinally or rotationally movable between a radially collapsed and expanded position and a filter membrane suspended on said mechanism
